1. FIRST SECTION

Here is the first section.

2. SECOND SECTION

We start this section by a definition (see [1]).

Definition 2.1. Here is the definition.

Example 2.2. Here is the example.

The form associated with $p(x, D)$ is defined for $u, v \in C_0^\infty(\mathbb{R}^n)$ by

$$(2.1) \quad B(u, v) = \int_{\mathbb{R}^n} p(x, D)u(x)v(x)dx.$$

For $u, v \in H^1(\mathbb{R}^n)$

$$|B(u, v)| \leq C\|u\|\|v\|.$$

Proposition 2.3. *Here is the proposition.*

Proof. Here is the proof. □

Theorem 2.4. *Here is the theorem.*

Proof. Here is the proof of theorem. □

Corollary 2.5. *Here is the corollary.*

Proof. By Theorems 2.4 and (2.1) we find... □
